

```
bin/zookeeper-server-start.sh config/zookeeper.properties
bin/kafka-server-start.sh config/server.properties
bin/kafka-topics.sh --create --bootstrap-server localhost:9092 --replication-
factor 1 --partitions 1 --topic test
```

Verification:

```
bin/kafka-console-producer.sh --bootstrap-server localhost:9092 --topic test
bin/kafka-console-consumer.sh --bootstrap-server localhost:9092 --topic test
--from-beginning
```

Delete:

```
bin/kafka-topics.sh --bootstrap-server localhost:9092 --delete --topic test
```

Daemon Mode

You can use the `-daemon` flag to run Zookeeper in daemon mode in the background

```
158,tcp,telnet,SF,1567,3095,0,0,0,3,0,1,4,1,0,0,1,0,0,0,0,0,1,1,0.00,0.00,0.00,0.00,
1.00,0.00,0.00,2,2,1.00,0.00,0.50,0.00,0.00,0.00,0.00,0.00,buffer_overflow,2
```
